

# OGTC Goes Green

## Sustainable and Responsible Textile

- In dealing with Climate Change and Global Warming, most major Retailers, Consumer & Luxury Goods Manufacturers, etc. have all pledged to **go Green** and work on reducing their **Carbon Emissions**.

- **OGTC** group of companies in close collaboration with **Cool Earth and supported by GIZ**, have embarked on a mission to measure and reduce the carbon footprint of the Textile Cluster in Okhla, New Delhi, India.T

- OGTC as responsible suppliers have taken the initiative voluntarily to measure, report and highlight their sustainability strategies & practices in combating climate change. Such a project is the first of it's kind in the world in the textile space. In a unique effort, the Textile cluster units in NCR of Delhi have come together in jointly working on carbon emission management strategies.

- **GIZ**, has been in India for 50 years and has been a **pioneer** in the field of sustainability, environmental protection and climate change and has supported and implemented a number of key initiatives in India. Their support for this project on carbon footprinting of the Textile cluster (OGTC) is being done to provide stimulus to companies in helping them make a sustainable and responsible textile products.

- Cool Earth is one of India's best qualified team of experts, having ties with the University of Edinburgh who have pioneered research in the field of Carbon management in the world. Cool Earth was the first to bring a '**CDP certified software**' to India and is currently the only consulting partner of the Water Footprint Network (Netherlands). Cool Earth will be helping OGTC companies perform their carbon footprint measurement and training them on climate change.

### Project Highlights:

**First Time In India**  
**'Industrial Cluster Carbon Footprint'** is being performed.

**Project being implemented in collaboration with OGTC, GIZ and Cool Earth**

**Carbon Footprint measurement conforms to GHG protocol using CDP certified software**

This project will equip OGTC companies to further their move to be one of the most Sustainable and Conscious suppliers in India. This project will be an example for other clusters and play a part in Sustainable Growth of India...
